Work Experience

Technical Support Engineer • Kish Air

April 2023 - December 2023 - Kish Island

- Assisted airline staff in resolving hardware and software issues and various airline-specific applications.
- Troubleshooted technical problems through analysis, research, and collaboration with the team, resulting in a 25% reduction in average resolution time for computer system issues.

Manager • S&H collection

May 2015 - December 2022 - Karachi & Kigali

- Created detailed reports of day-to-day financial operations using MS Suite.
- Overlooked the product delivery and feedback with international clientele.

Co-Founder • iMatter Initiative NGO

June 2018 - June 2020 - Kigali & Goma

- Created awareness about the struggles of women from rural backgrounds in Rwanda associated with health, hygiene and education by launching campaigns.
- Recruited volunteers, organized meetings, managed HR, and social media.
- Delegated a team of 10 core members and kept track of the online donations from Rwanda based clients.
- Ran 3 successful crowd-funding campaigns.

Projects

Data Analysis Project | Python - Power BI - Tableau

- Conducted in-depth analysis of large datasets, manipulating statistical distributions of 100,000 data points each using Python.
- Utilized Tableau and Power BI to analyze different forms of participant data, identified KPIs for optimizing a national-level competition called Gamein 2023.

Built A chatbot | Python - Botpress - DialogFlow

- Built an Artificial Intelligence (AI) based intelligent interactive chatbot that could work like a therapist.
- Performed in-depth research on intelligent chat bots response systems and compiled a thesis.

Portfolio Website | HTML - CSS - DJANGO

- Built a user-friendly portfolio website using web development practices showcasing all my projects and published the website on a domain.
